PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 9 months of production internship experience shipping web applications for clients using Next.js, TypeScript, and PostgreSQL. Improved platform page load times by 23% and reduced frontend defect rates by 15% through targeted performance work in an Agile team. Independently built and deployed two live SaaS platforms including a multi-tenant enterprise project management system demonstrating end-to-end ownership across the full stack. Seeking a junior engineering role that values shipping reliable software and continuous technical growth.

WORK EXPERIENCE

Software Developer (Work Integrated Learning) | Sima Digital Agencies

April 2025 – Dec 2025 (9 Months)

- Designed and implemented production web application features while collaborating within an Agile development team.
- Improved server-side rendering and database query efficiency, reducing average page load time by 23% across core application routes.
- Participated in Agile sprints, code reviews, and sprint planning, resolving UI bugs that reduced frontend defect rate by 15%.
- Built reusable React components with Next.js App Router and TypeScript, consuming REST APIs and integrating PostgreSQL-backed server actions.

PERSONAL PROJECTS

TeamFlow – Enterprise Multi-Tenant SaaS Project Management Platform

A production-grade enterprise SaaS platform built for multiple organisations to manage projects, teams, and workflows in isolated, secure workspaces.

- Designed and built a secure **multi-tenant SaaS** platform with organization-based workspaces and role-based access control.
- Developed full-stack project management features including projects, Kanban boards, task management, invitations, and team collaboration.
- Architected a scalable PostgreSQL database using Prisma ORM and built reusable React/Next.js components with TypeScript.
- Implemented authentication and authorization, server-side authorization, file uploads, audit logging, and analytics dashboards.

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, NextAuth, Zod, Server Actions, REST APIs, Git, GitHub, Neon, Vercel, CI/CD

Live Demo: <https://teamflow-rosy-three.vercel.app>

GitHub: <https://github.com/De-Junior/Teamflow>

ConnectDevs – Full-stack Developer Platform

A full-stack developer networking platform designed and shipped solo, where users can create profiles, showcase projects, and connect with other developers.

- Architected the data layer using Prisma ORM with PostgreSQL, designing relational schemas for users, posts, and connections.
- Implemented server-side rendering and optimised API routes using Next.js App Router, reducing initial page load time by 55ms and improving Largest Contentful Paint for a faster perceived user experience.
- Built a fully responsive, component-driven UI with Tailwind CSS and TypeScript, enforcing strict type safety across the codebase.
- Developed secure authentication, profile management, project showcasing, and developer networking functionality while maintaining a responsive user experience.

Tech stack: Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Supabase, React, REST APIs, CI/CD

EDUCATION

Diploma in IT NQF6 | Richfield Graduate Institute of Technology

Completed - 2025

- Relevant coursework: Programming, Web Technologies, Databases, Software Development, Software Engineering, Internet Programming

National Senior Certificate (Grade 12) | New Era COLLEGE

Completed - 2022

SKILLS

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, SQL
- Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI, TanStack Query, Zustand, React Hook Form, Zod
- Backend: Node.js, REST APIs, Server Actions, Socket.io, Redis, BullMQ, Authentication & Authorization
- Auth & Security: NextAuth, Google OAuth, JWT, bcrypt, Helmet, Rate Limiting, CSRF Protection
- Cloud & Storage: AWS S3, Vercel, Docker
- CI/CD & DevOps: GitHub Actions, CI/CD pipelines, Sentry
- Testing: Vitest, Playwright, React Testing Library
- Databases: PostgreSQL, Prisma ORM, Neon, Supabase
- AI & Payments: OpenAI API, Stripe
