PROFESSIONAL SUMMARY

Junior Full-Stack Software Engineer with proven experience building and shipping production web applications using React, Next.js, TypeScript, and PostgreSQL. Completed a 9-month internship at a digital agency where I contributed to live features, reduced UI bugs by 20%, and optimized MySQL databases in an Agile team. Seeking a junior full-stack role at a product-driven company where I can grow across the entire web stack.

EDUCATION

Diploma in IT NQF6 (Cum Laude) | Richfield Graduate Institute of Technology

2023 – 2025

- Relevant coursework: Programming, Web Technologies, Databases, Software Development, Software Engineering, Internet Programming

National Senior Certificate (Grade 12) | New Era COLLEGE

Completed 2022

- Relevant coursework: Mathematics, Life sciences, Agricultural sciences

SKILLS

Technical Skills

- Languages: Python, Java, JavaScript (ES6+), Node.js, SQL, PHP
- Web & Frameworks: HTML5, CSS3, React, TypeScript, Next.js, Tailwind CSS, RESTful APIs design
- Databases and Tools: MySQL, MongoDB, PhpMyAdmin, PostgreSQL
- Methodologies and Systems: Agile/Scrum, SDLC, System analysis, OOP
- Tools: Git, Vercel, Supabase, VS Code, CI/CD, Unit testing (Jest + React Testing Lab)

VOLUNTEER EXPERIENCE

Volunteer Data Visualization Intern | Tirisano Education Institute

Sept 2025 – Jan 2026 (5 Months)

- Analysed educational programme data using Excel, building structured spreadsheets and visual reports for stakeholder presentations.
- Mapped organisational relationships and programme networks using Kumu, translating raw data into interactive visual maps.

WORK EXPERIENCE

Software Developer Intern | Sima Digital Agencies

April 2025 – Dec 2025 (9 Months)

- Developed and maintained responsive web application features using HTML, CSS, JavaScript, PHP, and SQL, contributing to a 20% reduction in user-reported UI bugs across 3 active client projects.
- Collaborated in an Agile/Scrum team of 5 to debug, test, and deploy bi-weekly production updates with zero rollbacks.
- Optimized MySQL database queries, reducing average data retrieval time by approximately 30% for core application workflows.

PERSONAL PROJECTS

ConnectDevs – Full-stack Developer Platform

Built a full-stack developer networking platform where users can create profiles, showcase projects, and connect with other developers designed and shipped solo from database schema to deployment.

- Architected the data layer using Prisma ORM with PostgreSQL, designing relational schemas for users, posts, and connections.
- Implemented server-side rendering and API routes using Next.js App Router, reducing initial page load time.
- Built a fully responsive, component-driven UI with Tailwind CSS and TypeScript, enforcing strict type safety across the codebase.

Tech stack: Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, React, REST APIs, GitHub

Live Demo: <https://connect-liart-omega.vercel.app/>

GitHub: <https://github.com/De-Junior/Connect>

Healthcare Clinical Dashboard

Built a responsive clinical dashboard for monitoring patient vitals, lab results, and medical history integrating multiple REST API endpoints and visualizing real-time data with Chart.js across 5+ interactive chart types.

Tech stack: HTML5, CSS3, JavaScript, REST APIs, Chart.js

Live Demo: <https://de-junior.github.io/Health-Care/>

GitHub: <https://github.com/De-Junior/Health-Care>

CERTIFICATIONS

FNB App Academy (2025)

- Completed structured training in full-stack web development covering HTML, CSS, JavaScript, PHP, and SQL, with practical project work assessed by industry mentors.
